Historical overview of SunSource Energy

Setting up the company and initial years

- Co-Founded by 2 entrepreneurs in 2010 who came back to India after developing Multi-MW scale solar assets in the US.

Steady growth, gaining critical experience and mass

- Developed on-site Solar and EPC projects across India and SE Asia.
- Includes one of India's first private distributed Solar PPAs, Solar + Storage, and Floating Solar plants.

SHV Energy investment and integration

- SunSource Energy becomes part of SHV Energy.
- Expands off-site (Open Access) Solar development

The road ahead

- Focus on scaling up Open Access development to deliver on 1 GW plan.

Courage to Care is in the DNA of SunSource Energy

For People

- Transforming local communities with steady income (land lease)
- Generating meaningful employment opportunities
- Developing communities around the area of our operations

For Planet

- By delivering on our business plan, we will offset 22 Million Tonnes CO2 emissions over the lifetime of our operations
- Equivalent to planting 22 million trees

For Performance

- Targeting 10x growth between March 23- March 27
